

Terrazzo Allure™

Terrazzo Allure™ from MILE®stone introduces an architectural classic, with modern retro appeal, blending nostalgic design elements with bold, contemporary energy. Designed to feel luxurious and rich in texture without cluttered distraction, the collection provides architects and designers with a foundation to pair modern essentials with inspiring vintage patterns.

Terrazzo Allure™

Material fragments, color variation and the typical high-low shine of polished stones in terrazzo are digitally recreated by MILE®stone's innovative manufacturing process, letting designers introduce texture, tones and patterns in a fun and expressive way.

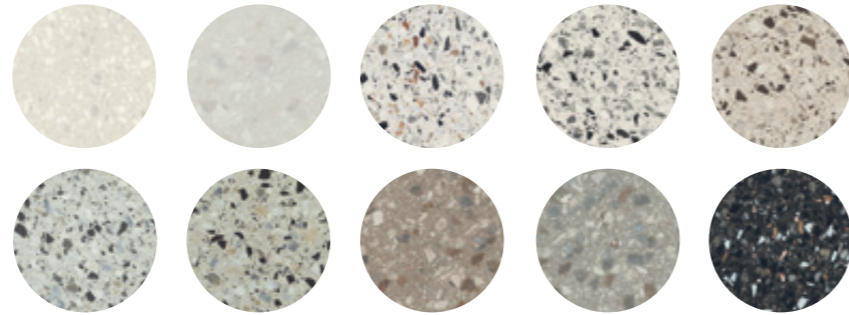

As part of MILE®stone's commitment to responsible manufacturing, Terrazzo Allure is proudly carbon neutral—thoughtfully produced to minimize environmental impact while maximizing design potential. The result is a collection that supports sustainable building practices without compromising performance, beauty, or creative freedom.

10 Colors

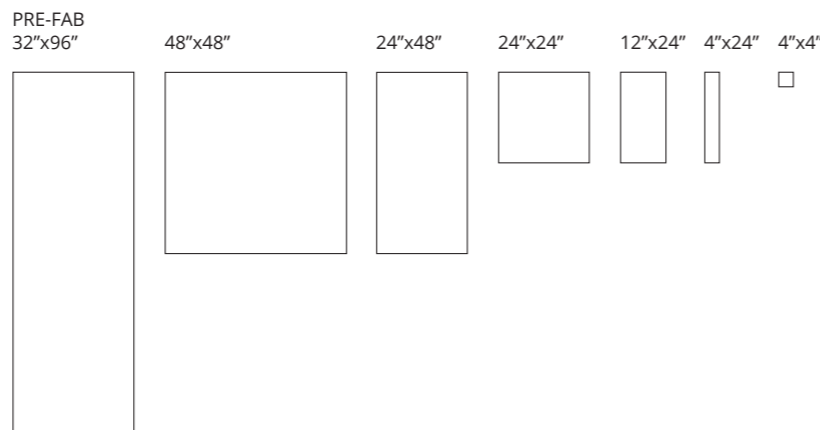

The Terrazzo Allure™ color palette offers classic white, gray and black tones in Snow, Dalmatian and Stonehenge. Earthy neutrals provide grounded warmth and approachability in Eggshell, Dune, and Tortoise, while unexpected hues like the soft blue of Azure and the light green of Mesquite add a mid-century vibe.

Venice has a playful confetti of color on a white background, and Constellation delivers bold contrast and depth with its dark background.

7 Sizes 2 Finishes 2 Thicknesses

Available in a variety of sizes, Terrazzo Allure is the perfect fit for residential and commercial spaces. The collection also introduces a unique 48"x48" size to create clean, minimalistic designs with built-in pattern and depth. A Grip finish is available in four colors, extending Terrazzo Allure's style to outdoor spaces.

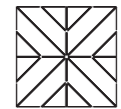

Deco Mosaics

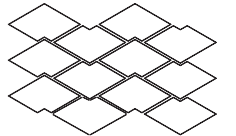

ICONIC AND DIAMOND DECO

The Iconic and Diamond introduce bold geometric patterning, adding a mid-century modern flair and graphic impact inspired by fashion, pop culture and pop art.

Modular Designs

4"x4", 4"x24" and 24"x24" modular sizes, designed to work seamlessly together, allow for effortless pattern building across the full Terrazzo Allure™ color palette. These formats can be mixed and matched to create distinctive floor or wall installations—using a single color for subtle dimension or combining contrasting tones to emphasize geometry, define zones, and introduce movement within a space. The result is a flexible design system: simple components that expand creative possibilities while maintaining a cohesive aesthetic.

The collection is completed with a Pre-Fab 32"x96 12mm panel with Sharknose and L-Shaped Top trims. These elements expand the applications of Terrazzo Allure™ beyond floors and walls to include countertops, tables and vanities, supporting cohesive, multi-surface design.

Porcelain tile, a durable choice for both wall and floor installations, offers a lower carbon footprint compared to other material options like carpet and vinyl. At MILE®stone, we go one step further by investing in carbon neutrality offsets because we believe sustainability is not just a buzzword, but an action.

All MILE®stone products are proudly made in the USA, from 100% regionally sourced raw materials. This supports local economies, reduces transportation-related emissions, and ensures full compliance with the Build America, Buy America (BABA) Act, giving architects, designers, and developers a responsible, transparent, and trustworthy sourcing solution.

MILE[®]stone is committed to contributing to the greater good across every aspect of our operations – from reducing environmental impact and supporting employee well-being to strengthening communities and upholding ethical governance. As a Certified B Corp, Florim USA is leading by example – shaping a more sustainable future because we believe **it's time to take responsibility.**

Progress that invests in the entire society

As an active member of the U.S. Green Building Council, MILE[®]stone spreads awareness to the community and encourages the use of building solutions through environmentally friendly practices. Our products positively contribute to the requirements for obtaining the LEED (Leadership in Energy and Environmental Design) and WELL (IWBI) certifications.

A commitment to environmental sustainability and responsibility

We are committed to conscious development that minimizes the negative impact of manufacturing production on the environment. Our general approach to sustainability intersects with our business strategy to embrace three areas of responsibility: economic, social, and environmental. Some ways we prove this are:

- Products containing as much as 64% recycled content.
- Zero industrial wastewater discharge.
- A 99% internal process recycling rate.
- 100% regionally sourced raw materials used in the production of the body of our tile, supporting local industries and sustainable practices.

MILE[®]stone is taking these and other steps, as well as actively investing to reduce carbon emissions to ensure that we reach full carbon neutrality.
